1	Communication Networks – Examples and attempt of a definition	1 - 1
1.1	Ubiquitous diversity	1 - 1
1.2	General communication model according to Claude E. Shannon	1 - 7
2	Introduction to the world of digital data networks	2 - 1
2.1	Comparison of digital data networks with analog technology	2 - 1
2.2	Characterization of data networks	2 - 1
2.3	Network topologies	2 - 3
2.3.1	Definition of terms	2 - 3
2.3.2	Bus topology	2 - 5
2.3.3	Ring topology	2 - 5
2.3.4	Star topology	2 - 6
2.3.5	Tree topology	2 - 6
2.3.6	Mixed network topologies – the normal case in complex networks	2 - 7
3	Protocols, basic communication architectures and services	3 - 1
3.1	Protocols	3 - 1
3.2	Communication architectures	3 - 2
3.2.1	ISO/OSI reference model	3 - 2
3.2.1.1	Construction of the layer model	3 - 2
3.2.1.2	Layer communication	3 - 5
3.2.2	TCP/IP Reference Model	3 - 8
3.2.2.1	Introduction	3 - 8
3.2.2.2	Subnetwork Layer	3 - 10
3.2.2.3	Internet Protocol Layer	3 - 10
3.2.2.4	Transport Layer	3 - 11
3.2.2.5	Application Layer	3 - 11
3.2.3	Application Protocols	3 - 12
3.2.3.1	General	3 - 12
3.2.3.2	Client/Server model and Peer-to-Peer connections	3 - 12
3.3	Services	3 - 13
4	Physical Layer	4 - 1
4.1	Functions	4 - 1
4.2	Ethernet – Example for a physical network medium	4 - 2
4.2.1	Basics	4 - 2
4.2.2	Original Ethernet Network	4 - 3
4.2.3	Fast Ethernet	4 - 4
4.2.4	Gigabit-Ethernet	4 - 5
4.2.4.1	Introduction	4 - 5
4.2.4.2	Characteristics of the physical layer	4 - 5
4.2.4.3	10-Gigabit-Ethernet	4 - 8
4.3	Transmission media	4 - 9
4.3.1	Symmetrical copper cables	4 - 9

4.3.2	Coaxial cables	4 - 12
4.3.3	USB Standard	4 - 14
4.3.4	Fiber optic cables	4 - 16
4.3.5	Wired networks in the industrial environment	4 - 20
4.3.6	Wireless communication networks	4 - 21
4.3.6.1	Introduction	4 - 21
4.3.6.2	Electromagnetic wave propagation	4 - 21
4.3.6.3	Short range networks	4 - 25
4.3.6.4	Bluetooth Technology	4 - 25
4.3.6.4.1	General	4 - 25
4.3.6.4.2	Wireless technology	4 - 25
4.3.6.4.3	Network topologies	4 - 29
4.3.6.4.3.1	Piconet topology	4 - 29
4.3.6.4.3.2	Mesh Topology	4 - 30
4.3.6.4.3.3	Broadcast Topology	4 - 30
4.3.6.5	Wireless USB networks	4 - 31
4.3.6.6	IEEE 802.11 networks	4 - 31
4.3.6.7	ZigBee Standard	4 - 32
4.3.6.8	IrDA Network	4 - 32
4.3.6.9	LiFi Communication Network	4 - 33
4.3.6.10	Wireless relay for remote data transmission	4 - 35
4.3.6.11	Interplanetary communication networks	4 - 35
4.4	Basics of digital information transmission	4 - 37
4.5	Pulse code modulation	4 - 39
4.6	Transmission channel encoding	4 - 40
4.6.1	Code elements, velocities und channel codes	4 - 40
4.6.2	Comparison of human and machine channel capacity	4 - 42
4.7	Operating modes	4 - 44
5	Data Link Layer and Data Frames	5 - 1
5.1	Tasks of the data link layer	5 - 1
5.2	Data frames	5 - 2
5.3	Logical Link Control	5 - 6
5.4	Collision mechanisms	5 - 7
5.4.1	General	5 - 7
5.4.2	Carrier Sense Multiple Access CSMA	5 - 8
5.4.3	CSMA with collision detection CSMA/CD	5 - 9
5.5	Throughput and efficiency	5 - 10
5.5.1	Bandwidth	5 - 10
5.5.2	Latency	5 - 10
5.5.3	Delay-Bandwidth Product	5 - 11
5.5.4	Information cube	5 - 11
5.5.5	Throughput and transfer time	5 - 12
5.5.6	Considerations on efficiency	5 - 13
5.5.6.1	Pure ALOHA technique	5 - 13
5.5.6.2	Slotted ALOHA technique	5 - 15
5.5.6.3	Considerations for Ethernet Efficiency	5 - 16
5.6	Error detection with polynomial codes	5 - 18
5.6.1	Numerical calculation	5 - 18
5.6.2	Hardware realization	5 - 21
5.7	Protocol examples for the implementation of the data link layer	5 - 22

5.7.1	Introduction	5 - 22
5.7.2	Unrestricted simplex protocol	5 - 24
5.7.3	Finite resources of the receiver	5 - 25
5.7.4	Consideration of noisy transmission media	5 - 26
5.7.5	Protocol with variable window size	5 - 29
5.8	Network hardware components on the data link layer	5 - 32
5.8.1	Bridges	5 - 32
5.8.2	Switches	5 - 35
5.8.2.1	Basics	5 - 35
5.8.2.2	Network topologies with switches	5 - 36
5.8.2.2.1	Hierarchical model	5 - 36
5.7.2.2.2	Redundancy model	5 - 37
5.8.2.2.3	Link Aggregation	5 - 38
5.8.2.2.4	Formation of virtual local networks	5 - 38
5.9	Network communication in the computer with the processor	5 - 40
5.9.1	Bus system in the Von-Neumann computer	5 - 40
5.9.2	PCI bus system	5 - 41
5.9.3	SATA bus system	5 - 42
5.10	Representation of data networks by graphs	5 - 44
5.10.1	Terminology	5 - 44
5.10.2	Representation of graphs	5 - 44
5.10.2.1	Introduction	5 - 44
5.10.2.2	Reduced graph	5 - 45
5.10.2.3	Adjacency matrix	5 - 45
5.10.2.4	Edge list	5 - 47
5.10.2.5	Linked list	5 - 48
5.10.2.6	Construction of minimum spanning trees	5 - 49
6	Networking and Routing	6 - 1
6.1	Tasks and service classes	6 - 1
6.2	Internet Protocol IPv4	6 - 4
6.2.1	Properties	6 - 4
6.2.2	Header of the Internet Protocol	6 - 4
6.2.3	Internet Checksum	6 - 8
6.2.4	Fragmentation	6 - 9
6.2.5	Addressing	6 - 10
6.2.5.1	Internet Protocol addresses	6 - 10
6.2.5.2	Subnets	6 - 13
6.2.5.3	Classless IP addresses	6 - 15
6.3	Routing	6 - 16
6.3.1	Definition	6 - 16
6.3.2	Datagram transfer between different physical networks	6 - 16
6.3.2.1	Flooding	6 - 17
6.3.2.2	Concept of the shortest path	6 - 17
6.3.2.2.1	Path tables and source-sink trees	6 - 17
6.3.2.2.2	Dijkstra's algorithm	6 - 19
6.3.2.3	Backward Learning	6 - 21
6.3.2.4	Hierarchical Routing	6 - 22
6.3.3	Datagram transfer within a physical network	6 - 22
6.3.3.1	Logical names, logical addresses and hardware addresses	6 - 22
6.3.3.2	Functionality of the Address Resolution Protocol	6 - 24

6.3.3.3	Functionality of the Reverse Address Resolution Protocol	6 - 26
6.3.4	Internetwork-Routing	6 - 26
6.4	Error messages on the network layer	6 - 28
6.4.1	Internet Control Message Protocol	6 - 28
6.4.2	ICMP format and message types	6 - 28
6.4.2.1	IP header and ICMP header	6 - 28
6.4.2.2	Error messages	6 - 29
6.4.2.3	Request messages	6 - 30
6.5	Internet Protocol Version 6	6 - 31
6.5.1	Addresses	6 - 31
6.5.2	Header	6 - 32
7	Transport Layer	7 - 1
7.1	Task of the Transport Layer	7 - 1
7.2	Protocol access on the transport layer	7 - 2
7.3	Connectionless Transport	7 - 3
7.4	Connection oriented Transport	7 - 6
7.4.1	Tasks and Ports	7 - 6
7.4.2	TCP Header	7 - 7
7.4.3	Stages and properties of the TCP connection	7 - 9
7.5	Client-Server Relationship	7 - 12
7.6	Practical realization of a simple TCP protocol	7 - 13
7.6.1	Form and method of practical implementation	7 - 13
7.6.2	Task and realization	7 - 14
7.6.3	Finite-State-Machine as a development tool	7 - 22
8	Application Layer	8 - 1
8.1	Application layer in the ISO/OSI protocol stack	8 - 1
8.1.1	Session layer	8 - 1
8.1.2	Presentation layer	8 - 1
8.1.3	Application layer	8 - 2
8.2	Application services using TCP/IP	8 - 3
8.3	Address management with the Domain Name Service DNS	8 - 5
8.3.1	Domains and domain names	8 - 5
8.3.2	Name resolution	8 - 7
8.3.3	Resource record	8 - 8
8.3.4	DNS message	8 - 10
8.4	HTTP Protocol	8 - 14
8.4.1	Functionality	8 - 14
8.4.2	Unique identification of documents on the Internet	8 - 14
8.4.3	Intermediate systems	8 - 16
8.5	Logging in and working on a remote computer with Telnet	8 - 17
8.5.1	Telnet functionality	8 - 17
8.5.2	Secure login at a remote Data station	8 - 18
8.6	File transfer with the File Transfer Protocol FTP	8 - 19
8.6.1	Introduction	8 - 19
8.6.2	Phases of the data transfer	8 - 19
8.6.3	Special operating modes of the FTP protocol	8 - 23
8.6.4	Implicit FTPS and explicit FTPS	8 - 24
8.7	Electronic mail	8 - 25
8.7.1	Standard email	8 - 26
